5776 Lamar St
Arvada, CO 80002
www.boreascampers.com

110V Air Conditioner Option - Coleman Mach 8

This is a 15,000 BTU unit designed for use in off road vehicles and construction equipment.

We will option this with the “soft start” system that will allow for some limited run time off of the standard Victron 2000W inverter. For extended run time a generator or shore power will be required.

\$2,450

12V Air Conditioner Option - Nomadic Cooling 3000

This is an 11,830 BTU unit designed for off grid A/C. Run time on the standard 200AH of lithium is 3-4 hours depending on load and climate [This time estimate does not account for the 300 watts of roof top solar]. Additional lithium can be added to extend this option [400AH Max]. The unit will run from a generator or shore power when available.

\$5,290
